How Much Hard-Earned Money are You Losing?

Becoming an expert in medical billing requires specialized knowledge, attention to detail, and understanding required processes. Whether doing it in-house or through a third party, many medical practices lose tens and sometimes hundreds of thousands of dollars per year through inefficient or incorrect billing. Many practices don't even know the right questions to ask.

We can help give you peace of mind by comprehensively reviewing your current billing processes and recommending actionable fixes to help you put more money in your pocket while ensuring you meet regulatory guidelines. Our review works regardless of whether you are billing in-house or utilizing a third party.

For a flat rate, we will conduct a COMPLETE review, and we will:

- Analyze your current AR
- Review coding
- Review your internal processes
- Review your external processes if you are using a third-party biller.
- Identify and calculate key metrics related to CPT codes, payers, charges, reimbursements, etc
- For an ongoing monthly fee, provide ongoing billing oversight as needed

We want to help you understand billing, so you truly control the cash flows of your practice.
